

GAYATRI CHAVAN

Full Stack Developer (React | .NET | SQL)

Kolhapur, Maharashtra 416111 | 7020197930 | gayatrichavan347@gmail.com
linkedin.com/in/gayatrichavan-cse | github.com/gayatrischavan

Professional Summary

Full Stack Developer with hands-on experience building web applications using React.js, ASP.NET Core Web API, C#, and PostgreSQL/SQL Server. Currently developing modules for a live ERP system, including REST APIs, role-based authentication, and responsive user interfaces. Built and deployed an AI-powered resume screening platform using the Google Gemini API.

Technical Skills

Programming Languages: C#, C, Java, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: ASP.NET Core Web API, REST APIs, Entity Framework Core, JWT, MediatR (CQRS), FluentValidation

Databases: PostgreSQL, SQL Server, MySQL, MongoDB

AI, Tools & DevOps: Google Gemini API, Git, GitHub Actions (CI/CD), Docker, Swagger / OpenAPI

Experience

Software Development Intern (Full Stack Developer)

Dec 2025 – Present

B2A Technologies Private Limited, Jaysingpur

Dhanman (Dgtula) – Business & Accounting Management Platform

- Currently developing and maintaining modules for a live, multi-tenant ERP platform through Git pull request reviews.
- Designed and built RESTful APIs in ASP.NET Core for the Gate Pass, Polls, and User Management modules, including reusable email-uniqueness validation across ERP entities (customers, employees, residents, vendors, service providers).
- Developed React.js interfaces for Gate Pass, Polls, and Escalation Matrix modules with client-side validation and API integration.
- Implemented role-based access control with organization-level data filtering for a multi-tenant application.
- Integrated dashboard chart and Water Tanker transaction APIs with frontend screens and fixed rendering issues.
- Resolved cross-layer defects (API binding, routing, nullable mappings, PostgreSQL constraints) in the live ERP codebase.

Java Development Intern (Learning-Based)

Dec 2023 – Jan 2024

CodeXlabz Technologies | Strengthened Core Java and Object-Oriented Programming (OOP) concepts

Projects

AI Resume Screener (Full Stack, AI-Powered)

github.com/gayatrischavan/AIResumeScreener

React 19, TypeScript, ASP.NET Core (.NET 9) Web API, PostgreSQL, Google Gemini API, JWT, Docker

- Built a full-stack web application that analyzes resumes against job descriptions using the Google Gemini API, returning a match score, strengths, weaknesses, and a hiring recommendation.
- Designed the .NET 9 backend with Clean Architecture and CQRS (MediatR), using FluentValidation and pipeline behaviors for request validation and logging.
- Implemented PDF resume upload with text extraction (iText), stored results in PostgreSQL using EF Core migrations, and secured the API with JWT authentication.
- Built a responsive UI with Vite, Tailwind CSS, Zustand, React Hook Form, and Zod for resume upload, job management, and analysis results.
- Deployed the API on Render (Docker), the database on Neon, and the frontend on Vercel; automated build and deploy with GitHub Actions.

TPO Portal (Training & Placement System)

React.js, ASP.NET Web API, C#, SQL Server

- Built a placement management app with registration and company listing using React.js and ASP.NET Web API.

Education

Bachelor of Technology (CSE) – CGPA: 8.05

2021 – 2025

D.Y. Patil Technical Campus, Faculty of Engineering & Faculty of Management, Talsande, Kolhapur

HSC – 88.33% | Jaysingpur College, Jaysingpur

2020 – 2021

Certifications

AI-ML – AICTE (Eduskills) | Java – Great Learning | Power BI – Internshala | Git Training – Simplilearn
